has successfully completed the online Professional Certificate

Snowflake Data Engineering

Those who earn the Snowflake Data Engineering Professional Certificate have completed three courses that include hands-on exercises that are designed to prepare them for roles in data engineering that require Snowflake skills. They are competent in building modern data pipelines on Snowflake, including data ingestion, data transformation, data delivery, pipeline orchestration, DevOps and observability.

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
